1. A young child’s referential associations between quantities and number words and numerals. Ursula S Anderson & Sara Cordes

2. Selective attention in young infants: Gaze shifts and stimulus attention-getting features. Donna Fisher-Thompson, Ashlyn Boniszewski, Sarah Tassini, Frances Novak, & Bethany Legget

3. Do children rely on a non-epistemic mechanism to enrich their epistemic status? Igor Bascandziev & Paul Harris

4. Recoding and decoding in toddler working memory. Melissa M. Kibbe & Lisa Feigenson

6. Moral identity is related to self-perceived and teacher-rated behavioral conduct in 3rd-7th grade children. Elizabeth A. Boerger, April Burns, Karisa Mauthe, & Sarah Falkowitz

7. Acute effects of physically active versus inactive video game play on children’s executive functioning. Rachel M Flynn

8. Effects of choice and strategy use on task switching in children and adults. Allison O’Leary & Vladimir Sloutsky

10. Parent-toddler interactions during motor play: Implications for developing verb comprehension. Ruth Tincoff, Amanda Slaboden, & Samantha Schindelheim

11. Children's understanding of villains and evil. Craig E. Smith, Felix Warneken, Susan Gelman, & Henry Wellman

12. Two-year-olds’ understanding of self-symbols. Kate Herold & Nameera Akhtar

13. The impact of wealth on sharing preferences in children. J. Miller, B. Schilder, L. Peizer, & F. Subiaul

14. Uncovering the extent of young adults' social essentialism. R. Cole Eidson & John D. Coley

15. Individual differences in children’s ability to successfully gather information from others to solve problems. Candice Mills, Ashley Landrum, Rachel Williams, & Amelia Pflaum

16. Young children’s transfer of fantastical and realistic problem solutions from television characters. Molly Schlesinger

17. Gestures provide more than a helping hand: Gestures’ impact on learning. Theodora Koumoutsakis, Adam Kaltenhauser, Alejandro Silva, Amanda Brown, R. B. Church, & S. Ayman-Nolley

18. The development of domain-specific beliefs about the homogeneity of animal, artifact, and social categories. Amanda C. Brandone & Laura E. Spearot

19. Learning begets learning: Infants use native language statistics to segment and learn words. Katharine Graf Estes

20. Children’s memory for culturally relevant similarity across individuals. Kathleen R. Sullivan & Katherine D. Kinzler

21. Double dissociation: Integrating color/shape aids conditional discrimination but separating them aids card sorting in 3½-yr-olds. Daphne Ling, Cole Wong, & Adele Diamond

23. Specifying the effects of causal information on early word learning. Amy E. Booth & Aubry Alvarez

24. 3-month-old infants exhibit sensitivity to action efficiency following active experience. Amy Skerry, Susan Carey, & Elizabeth Spelke

25. Complement syntax, mental verbs, and theory of mind in children who are deaf. Holly B. Kedlington & Steve Ball

27. Longitudinal predictors of success in mathematics: Understanding the role of spatial memory, sustained attention, and inhibitory control. Alycia M. Hund & Rachelle Cantin

28. Sticking to the evidence? A behavioral and computational case study of micro-theory change in the domain of magnetism. Elizabeth Bonawitz, Tomer Ullman, Sophie Bridgers, Alison Gopnik, & Josh Tenenbaum

29. Toddlers’ interactive behavior during video-chat predicts learning. Renee E. Gallo & Lauren J. Myers

30. Preschool children’s reports of frequency and temporal information for experienced events. Laura Melnyk & Becky Earhart

32. Searching for a bilingual advantage in executive function: A latent variable approach. Seamus Donnelly, Katie Pace-Miles, Rosario Maita, & Bruce Homer

33. Preschoolers’ use of past accuracy when learning objective and subjective information. Patricia E. Brosseau-Liard, Grace Qiao, & Susan A. J. Birch

34. A longitudinal fMRI study examining theory of mind development. Hilary Richardson

35. Effects of developments in abstract thinking, world knowledge, language & metamemory on category development in 3-8 year olds. Nora Isacoff & Karin Stromswoold

36. From smiles to noncompliance: Exploring children’s behavior in helping situations. Priscilla Sung

38. Culture of honor in media and development. Jennifer L. Barnes & Ryan Brown

39. Relative need and resource allocation in young children. Talia Berkowitz & Susan Levin
40. Enumeration of small versus large numbers of items under high working-memory load. Chiu-Yuan Chang & Wen-Chi Chang
42. The effects of mindfulness training during adolescence. Kristen Lyons, Jillian L. Sterns, & Iroise Dumonthiel
43. Eight-month-old infants can integrate physical constraints in probabilistic inference. Stephanie Denison & Fei Xu
44. The effect of labels on haptic memory in children. Shealan McAlister, Amy Felix, Keeth Needham, Bob Frank, & Heidi Kloos
45. Motor-spatial development in preschoolers: Learning goal directed actions and gestures from video. Laura Zimmermann, Natalie Brito, Chagai Mendelson, Rachel Barr, Elizabeth Renner, Brian Schilder, & Francys Subiaul
46. Investigating relationships between executive functions and conceptual change processes. Dimitris Pneumatikos, Giorgos Kyrianakis, Stella Vosniadou, Kalliopi Eikospentaki, & Nikos Makris
47. Strategic memory monitoring: The role of confidence in help seeking. Shaina F. Rowell & Vikram K. Jaswal
49. The role of outcome in reasoning about food allergy. Steve Croker, Kailyn Russell, & Rebecca Knibb
51. Experimentally induced involuntary memories in young children. Osman Skjold Kingo, Jonna Jelbak Dahl, Dorte Berntsen, & Peter Krøjgaard
52. Competing cues and the development of landmark use. Amy E. Learmonth, Nicole Caltabellotta, Alejandra Jimenez, & Derek Voyticki
53. A coat of needles would be fine, if I could be a...porcupine: Pausing and rhyme in word learning and retention. Megan Mcauley
54. Preference for positive evaluations about competence: Children disregard expertise and consensus information. Chelsea Hughes
55. Constructing explanations leads children to privilege inductively rich properties. Caren M. Walker, Tania Lombrozo, Cristine Legare, & Alison Gopnik
56. Examining consistency of young children's exploratory behavior. Jamie Jirout
57. Source constrained retrieval in children and young adults. Vanessa Carlos, Ezekiel Rodriguez, Thomas C. Lorsbach, & Jason F. Reimer
58. When less is more and more is even worse: Magnitude influences preschoolers' performance on a reverse reward task. Emily J. Ostergaard
59. Inconsistent and ambiguous evidence inform hypothesis-testing behavior in young children. Justin T.A. Busch & Cristine H. Legare
60. Repetition effects on passive priming in English language learners. Sahar Lewis, Perla Gamez, & Priya Shimpi
61. Selective social learning of plant edibility in human infants. Annie E. Wertz & Karen Wynn
62. Examining recall memory in young adults: The importance of habitual sleep quality. Helen M. Milojevich & Angela F. Lukowski
63. 5- to 9-year old children take longer to correctly attribute belief based emotions than emotions not based on a false belief. Samuel Ronfard & Paul Harris
64. Ignoring the point: Preschoolers prefer to learn from speakers over pointers. Carolyn M. Palmquist
65. Thee, uh, role of discourse status and object novelty in three-year-olds' understanding of disfluent utterances. Sarah J. Owens & Susan A. Graham
67. The effects of small and large number talk on children's number knowledge. Dominic Gibson, Elizabeth Gunderson, & Susan Levine
68. Preschoolers consider ownership when predicting emotions. Madison Pesowski & Ori Friedman
69. I see what you're thinking': Examining how picture books can promote false-belief understanding in preschool children. Valerie San Juan & Yasmine Ghotrial
71. Is a tippu a teppu? Generalizing talker-specific accents during word learning. Drew Weatherhead & Katherine White
73. The effects of perspective and math level on developmental math students' conceptual understanding of mathematics. Eric Amsel
74. The impact of emotional information on executive function in children and adults. Hannah J. Kramer
76. Infants chunk objects using ownership cues. Aimee Stahl & Lisa Feigenson
78. Creature feature: Learning about novel animals based on verbal descriptions. Maria Osina
80. The relation between theory of mind and empathy in preschool: The case of fantasy orientation. Melissa McInnis, Jillian Pierucci, & Ansley Tullos Gilpin
81. The relationship between parents’ concepts of lying and children’s theory of mind. Carolyn A. Schult
82. Location is the key: The relationship between location and narrative coherence in early memories. Maria S. Jones, Marina Larkina, & Patricia J. Bauer
83. Small children’s verbal and nonverbal long-term memory for short movies. Osman S. Kingo & Peter Krøigaard
84. Effects of training on category learning: Developmental differences between adults and children. Wei Deng
85. Culture and the development of social essentialism: How children reason about religious categories. Lisa Chalik, Marjorie Rhodes, & Sarah-Jane Leslie
86. Preschoolers’ trait attributions: The roles of theory of mind and behavioral and affective cues. Nicole R. Guajardo, Alexis Pham, Lauren Royster, Kylie Woodrum, & Renee Roccato
87. Pre-kindergarteners’ numeracy and spatial development: The influence of educators’ language. Rosalie Odean, Carla Abad, Amanda Costales, Natalie Herradon, Sandra Ferret, & Shannon M. Pruden
88. Eye-tracking your attention: The development of emotional memory and encoding processes. Anne Hermes, Aoxiang Xu, & Patricia Bauer
89. A longitudinal study of life story development from age 9 to age 12. Annette Bohn & Dorthe Berntsen
